

**APPENDIX B**  
**INTERFERING CLAIMS CORRESPONDING TO THE COUNT**

<b>Count</b>	<b>Claim 72 of the Present Application</b>	<b>Claim 50 of the Milwaukee '790 Patent</b>	<b>Why the Claims Interfere</b>
A reciprocating saw comprising:	A reciprocating saw comprising:	A reciprocating saw comprising:	Claim 72 of the present application and claim 50 of the Milwaukee '790 patent are identical to the Count. Therefore these claims correspond exactly to the Count and interfere with each other.
a reciprocatable spindle for supporting a saw blade for reciprocating sawing movement;	a reciprocatable spindle for supporting a saw blade for reciprocating sawing movement;	a reciprocatable spindle for supporting a saw blade for reciprocating sawing movement;	
a body defining a longitudinal pivot axis and housing a motor and a drive mechanism driven by the motor, the drive mechanism selectively driving the spindle, the body having a forward end supporting the spindle and a rearward end; and	a body defining a longitudinal pivot axis and housing a motor and a drive mechanism driven by the motor, the drive mechanism selectively driving the spindle, the body having a forward end supporting the spindle and a rearward end; and	a body defining a longitudinal pivot axis and housing a motor and a drive mechanism driven by the motor, the drive mechanism selectively driving the spindle, the body having a forward end supporting the spindle and a rearward end; and	
a grip engageable by a hand of an operator, the grip being connected to the rearward end of the body for pivoting movement relative to the body about the pivot axis.	a grip engageable by a hand of an operator, the grip being connected to the rearward end of the body for pivoting movement relative to the body about the pivot axis.	a grip engageable by a hand of an operator, the grip being connected to the rearward end of the body for pivoting movement relative to the body about the pivot axis.
